

Outlaw Bass Features:

FUJI REEL SEAT

Featuring a Fuji Carbon Hybrid Reel seat which has been finished in a rubberized carbon pattern perfectly suited to the rod. The large exposed blank area adds extra sensitivity and combined with ergonomically shaped EVA and Carbon screw adjustment.

TITANIUM SEMI-MICRO GUIDES

Designed to be an evolution of the conventional micro guides being more versatile, practical and stronger.

PRECISION BALANCED BLANK

All waft out blanks are perfectly balanced from the tip to butt section for improved feel, casting distance and accuracy.

MICRO-TECH ARMORED CARBON FIBER BLANK

Currently the most advanced carbon composition blank in the world exclusively developed for waft that results in ultimate sensitivity, lightness, balance and strength.

OPTIC-SENS TECHNOLOGY

A new sensitivity system set to make the Waft outlaw range the most sensitive high performance bass rod on the market incorporating micro fibers that acts as veins to take bite detection to new unequaled heights.

WEIGHT MANAGEMENT SYSTEM

Derived from Waft's surf rod technology, this results in the rods action changing when using different lure weights causing different parts of the blank to work to suite a required purpose.

ULTRA LIGHT WEIGHT CONSTRUCTION

Weight kept to a minimum by combining the best quality components and raw materials available.
